EXHIBITIONS

At different periods, we expect to make displays of our Rock Garden Plants, Lilacs, Iris, Peonies, Gladiolus, Hardy Lilies, Hardy Herbaceous Flowers, Vegetable, Garden and Farm Produce. We invite our patrons to visit our store, where courteous treatment will be accorded by our fellow workers who have aided us in the expansion of our business, and who share with us its prosperity.

ORDER EARLY

We request our customers to order as early as possible on receipt of catalogue. We endeavor to ship all orders immediately on receipt, but during the busy season it is almost impossible; hence, the importance of ordering early.

PARCELS POST

We deliver free by Parcels Post all seeds, except Beans, Corn, Peas, Farm Seeds or Clovers. If these are wanted by mail, please add the cost of postage at zone rates.

Fertilizers, insecticides, sundries, trees and plants are at all times excluded from free delivery.

No charge for delivery to railroad station, steamer or express office.

Owing to the scarcity of all bags, we are compelled to charge them at cost and credit will be given when returned, charges prepaid, if in good condition.

GARDENERS AND FARMERS

Parties requiring the services of reliable men, married or single, should consult with us, as we have the names of a number on our register, thoroughly experienced in every branch of the business. We have a large acquaintance among gardeners in this vicinity, and it is seldom that anyone who applies to us fails of getting the right party. No fee.

SPECIAL NOTICE: PRICES

The prices published in this Catalogue are subject to market changes without notice. Owing to the fluctuating market in prices of all materials, we cannot bind ourselves on prices of any articles.

WE ISSUE THE FOLLOWING CATALOGUES AND SPECIAL LISTS

BULBS FOR IMPORT: All the latest varieties that may be ordered before Aug. 1st and imported specially to order, May 15th.

BULB CATALOGUE: Ready about July 1st, containing a complete list of all bulbs for Fall planting and greenhouse forcing.

LILACS. A list of 100 of the best varieties.

LILIES. A complete list of 80 varieties described and illustrated.

Novelties and Specialties in Flower Seeds

CYNOGLOSSUM

Marshall's Blue Gem

An early flowering biennial producing large sprays of brilliant blue Forget-me-not flowers. Fine for dwarf borders. Height 18 inches. Pkt. 50c.

Delphinium, Wrexham Hybrids

DELPHINIUM

Wrexham or Hollyhock Hybrids

This wonderful strain is conspicuous for its broad-based tall spikes, carrying large individual flowers that run largely in deep shades, much prized by experienced growers. Even the young plants blooming for the first time are a revelation to Delphinium growers, and their massive character in fuller maturity is cause for fresh amazement. Pkt. \$2.00.

DIGITALIS, Isabellina

A distinct break; the color is a beautiful sulphur-yellow, and the habit of the plant as robust as Digitalis purpurea. Pkt. 50c.

GEUM

Orange Queen

We are pleased to be able to offer a Geum of a shade intermediate between Mrs. Bradshaw and Lady Strathe-den. The plants are of similar habit to both and quite as large and free blooming in a beautiful orange color. Pkt. 50c.

LARKSPUR

Emperor, Pink Delight

A fine new Larkspur, suitable for bedding or pots, of compact growth. A charming soft pink color. Pkt. 50c.

LUPINS

Marshall's Matchless

An entirely new strain, comprising a wonderful range of previously unknown colors among perennial Lupins.

- Matchless.** Apricot shades. Pkt. 50c.
- Matchless.** Bronze and copper shades. Pkt. 50c.
- Matchless.** Creamy pink shades. Pkt. 50c.
- Matchless.** Light yellow shades. Pkt. 50c.
- Matchless.** Red and mahogany shades. Pkt. 50c.
- Matchless.** Yellow shades. Pkt. 50c.
- Matchless.** Mixed shades. Pkt. 50c.

Collection, 1 pkt. each six shades, \$2.50.

MARIGOLD

Marshall's Giant or Tree

In type it closely resembles a French Marigold, but the coloring and size of flower is much superior. They grow from 4 to 5 feet high making a fine decorative plant and the flowers do not have the unpleasant odor of the Marigold. Pkt. 50c.

MYOSOTIS

Marshall's Blue Bird

A very fine dark blue variety with long stems for Winter blooming. Sow seed in June outside and transplant in the Fall in greenhouse for inside culture. Pkt. \$1.00.

SIDALCEA

Stark's Hybrids

A real good, hardy border plant, easily raised from seed. The colors embrace all shades from bluish, pink, rose, carmine and crimson. The height varies from 2 to 4 feet and it flowers from June to September. Pkt. 50c.

STATICE Perezii

A charming addition to the Statice family. The flowers are a very fine bright blue color on long stems. A fine variety for pot culture and outdoor flowering. The plants should be put in coldframes for Winter protection. Pkt. 50c.

VERBENA

Grandiflora Erecta Royal Bouquet

A valuable decorative plant for bedding or growing in pots. It forms a plant 15 to 18 inches high and 10 inches across. The distinct feature is its compact, erect habit. Mixed colors. Pkt. 25c.

VERBENA Luminosa

A new color added to the Mammoth Verbenas. Large blooms of luminous flame pink toning to softer shades of salmon, flesh and coral, giving the whole a most beautiful color that must be seen to be appreciated. Pkt. 50c.

Specialties in VEGETABLE SEEDS

BEET. Marshall's Exhibition

A selected strain of the Globe type; roots medium size, symmetrical in form, and unrivaled for the exhibition or table use. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

CABBAGE. Marshall's Baby Head

Small, perfectly round, solid heads, few outer leaves, adapted for forcing in hotbeds or for early use in the garden. The small heads mature in six to seven weeks after planting. Pkt. 15c., $\frac{1}{2}$ oz. 60c., oz. \$1.00.

CARROT. Marshall's Exhibition

A superb type of intermediate Carrot. The skin is clear, bright in color, and the flesh close in texture, with very small core. In competition on the exhibition stage this variety has carried off more prizes than any other Carrot. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00, lb. \$3.00.

CARROT. Long Red Surrey

A fine exhibition variety, with long, tapering root, smooth skin of orange-red color. A good keeper and suitable for deep soils. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00.

CELERY. Marshall's Golden Plume

A new strain of the Golden Self-Blanching, being larger; blanches more quickly, matures earlier and not subject to blight. It has a delicious flavor and is crisp and tender. Pkt. 25c., $\frac{1}{2}$ oz. \$3.00.

SWEET CORN Marshall's Earliest of All

The earliest Sweet Corn, stalks about 4 feet high, ears 6 to 7 inches long, grain white and excellent quality. $\frac{1}{2}$ pt. 15c., pt. 30c., qt. 60c., 4 qts. \$2.00.

CORN. Charlevoix

An early or intermediate, yellow-grained, sweet Corn of distinctive merit. Ears about 7 inches long and usually twelve-rowed. Very sweet and tender. $\frac{1}{2}$ pt. 15c., pt. 30c., qt. 60c., 4 qts. \$2.00.

LEEK. Marshall's Giant

The largest and best Leek for exhibition. Highly recommended as the choicest variety in cultivation; of a mild, delicious flavor. Pkt. 10c., oz. 80c.

LETTUCE. Marshall's Matchless

This distinct Lettuce which we introduced some years ago has been admired by all who have seen or used it. It is a cross between a head and Cos variety, very crisp and brittle, flavor distinct from other kinds and the best possible variety for home use. Fine for early frames or Summer use. Pkt. 10c., oz. 60c., $\frac{1}{4}$ lb. \$2.00.

LETTUCE. Marshall's Royal Summer

A large butter head variety with dark green, tinged with brown and spotted leaves. The inside of the head is a rich golden yellow of the finest quality. A fine variety for Summer use. Pkt. 10c., oz. 60c.

Cabbage, Baby Head

MANGEL. Giant Sludstrup

A long, reddish yellow, ovoid root, growing more than half above the ground. It excels any other variety in weight and feeding value. $\frac{1}{4}$ lb. 30c., lb. 80c.

MELON. Marshall's Matchless

This Musk Melon is the largest and most luscious Melon we have seen. The fruits average from 15 to 20 lbs. in weight, are wonderfully uniform in shape, distinctively ribbed and netted. The flesh is an orange-scarlet color, very thick, edible to the rind and of a luscious flavor; the seed cavity is very small for so large a Melon. Pkt. 25c., oz. \$1.00.

ONION. Marshall's Ailsa Craig

The skin is a pale straw color; oval in shape. Excellent for exhibition purposes. The seed we offer is imported and grown from a selected strain. Pkt. 25c., $\frac{1}{2}$ oz. 75c., oz. \$1.50.

ONION. Marshall's Invincible Giant

The latest and best exhibition Onion. This is not an improved strain of Ailsa Craig, but grown under the same conditions, produces bulbs one-third larger. Pale yellow in color. The seeds we offer are carefully selected for us by an English grower. Pkt. 25c., $\frac{1}{2}$ oz. \$1.00, oz. \$2.00.

PEPPER. Marshall's Earliest

A very early variety, adapted for the home garden. Plants dwarf and compact and very productive. The fruits are pendant, mild, sweet and similar to Large Bell in shape. Pkt. 10c., $\frac{1}{2}$ oz. 50c., oz. \$1.00.

PARSLEY. Marshall's Crested Gem

The dwarf, compact habit of the plant and the fineness of the closely cut foliage are unsurpassed. Pkt. 10c., oz. 50c., $\frac{1}{4}$ lb. \$1.50.

TURNIP. Quicksilver

Fine for exhibition; round, white skinned, with solid white flesh, very quick growing. Pkt. 10c. oz 35c., $\frac{1}{4}$ lb. \$1.00.

In many of the exhibits of the flower shows held during the past year, our strains of vegetables were among the prize winners in various classes and collections.

RARE PLANTS AND BULBS

ANCHUSA *myosotidiflora*

THE HARDY PERENNIAL FORGET-ME-NOT ANCHUSA

The great adaptability of this recent acquisition is little known at present. It is unique as the only hardy plant that has a true blue flower early in the Spring. It can be used in the open border or for forcing in the greenhouse and grown equally well in the sun or shade. Clusters of bright blue Forget-me-not flowers are borne early in May in great profusion. The foliage is a dark green, growing not higher than 10 to 12 inches. It makes an ideal plant for bordering beds of Tulips. We offer an exceptionally fine strain of this novelty in large clumps. Each 60c., 10 for \$5.50, 100 \$50.00. Delivery free.

AMARYLLIS *equestris* fl. pl.

A double form of the Barbados Lily. Flowers rich orange, very double. It is suitable for outside planting or for pot culture.

Large bulbs. Each 50c., doz. \$5.00.

LYCORIS *purpurea*

An introduction from Japan, but now very scarce. The foliage is produced in Spring and ripens up in August, after which the flower stalks appear, producing flowers in clusters of 6 and 8 flowers of 6 petals each. The bud is wine color, changing to royal purple when expanded, giving a startling and beautiful effect. Perfectly hardy. 2 feet high.

Strong flowering bulbs, each \$1.00, doz. \$10.00.

LYCORIS *squamigera*

A perfectly hardy bulb of the Amaryllis family. They produce attractive green foliage in the early Spring, which later dies away, and about a month later the flower stalks appear, growing about 2 feet high and developing an umbel of large lily-shaped delicate pink flowers shaded with clear blue. Extra large flowering bulbs. Each \$1.00, doz. \$10.00.

Anchusa myosotidiflora

VIOLA *Jersey Gem*

The most valuable bedding Viola suited to our climatic conditions. They will bloom continuously from May until the Fall. The plant is of compact, sturdy habit and produces a pure violet flower with stems six inches long in great profusion.

Plants. 10 for \$3.50; 100 for \$30.00.

WATSONIA. Pink and White Mixed

These resemble Gladiolus in habit, blooming from July to September in the garden. They are fine for forcing in the greenhouse, in pots or benches. Bulbs should be lifted in the Fall in this latitude and stored for the Winter. Each 20c., doz. \$2.00, 100 \$14.00.

Watsonia, White

NEW HARDY PERENNIALS

AQUILEGIA. Long-spurred, Pink Shades

A beautiful strain of nothing but clear pink colors that are most striking and greatly admired. Each 40c., 10 for \$3.50.

LUPINUS *polyphyllus*, Giant Flowing Varieties

The following varieties have immense flower spikes, the individual flowers being large and the colors very brilliant.

Rosy Morn. deep pink; **Ruby King**, ruby red; **Sunshine**, pure yellow. Strong pot grown plants. Each 75c., 10 for \$7.00.

PHYSOSTEGIA *virginica*, Vivid

A new variety growing about three feet high. The flowers are much larger than the old variety and have a much deeper pink coloring, lasting a long time when cut. Each 40c., 10 for \$3.50.

NEW ANTIRRHINUMS

- Geneva Pink.** A glistening rose-pink with long dense spikes.
Golden Pink Queen. A superb variety.
Helen. A beautiful light pink.
Indian Summer. Rich velvety copper.
White Rock. The best forcing white.
 Plants from 2½-in. pots, doz. \$2.50, 100 \$15.00.

NEW CARNATIONS

- Arctic.** A pure snow white seedling from Matchless. Large flower and very free flowering.
Yuletide. An intense scarlet with a rich clove perfume. A free and early bloomer, giving its heaviest crop for Christmas.
 Rooted cuttings of the above, doz. \$3.50, 100 \$25.00.

For other Greenhouse Roses, see page 68.

NEW GREENHOUSE ROSES

- Briarcliff.** The color is more brilliant than Columbia, without the salmon undertones, being a true rose-pink.
Senator. A wonderful new dark scarlet Rose without the slightest trace of blue. Bud is long, pointed and well formed, fragrance wonderful.
 Grafted stock of the above, 2¼-in. pots, Doz. \$9.00, 100 \$65.00.
Mrs. F. R. Pierson. A wonderful new Rose. A fine sport of Premier with all its sterling qualities.
Souvenir de Claudius Pernet. A beautiful yellow Pernetiana Rose. Grafted on rosa odorata.
 Grafted stock of the above, 2¼-in. pots, doz. \$10.00, 100 \$75.00.

DELPHINIUMS

Named varieties of these beautiful, hardy plants have been very scarce the past few years. We have a nice stock of the following varieties in strong plants for Spring delivery.

- Amos Perry.** Flowers semi-double, rich rosy-mauve in color, overcast sky-blue; dark eye.
Andrew Carnegie. Deep mauve, overlaid with silvery blue. Semi-double flowers with white eye.
Capri. A clear sky-blue—best of its color.
C. W. Matthes. Semi-double; pure blue with light and dark stamens; tall and late.
King of Delphiniums. Flowers of enormous size; semi-double, of a deep purple-blue color, with white eye.
Lady Ravensworth. Pure blue with black eye. Very large, individual flowers on tall spikes.
Lamartine. Single, dark blue with fine, branching habit.
Lize. Tall-growing with spikes of large, single, sky-blue flowers, with a yellowish eye.
Moerheime. This is one of the finest pure white forms of the Belladonna type. Each 75c., \$6.50 for 10.
Queen Wilhelmina. Sky-blue; single; tall grower.
Rev. E. Lasceles. The double flowers are a rich blue and have snowy white petaloid stamens edged with blue.
Salland. Single; deep blue flowers in loose spikes. Very attractive.
The Alake. Large, semi-double flowers. The outer petals are intense dark blue, inside violet.

Pot grown plants of the above named varieties, each \$1.00, 10 for \$9.00, except where noted.

JAPANESE KURUME AZALEAS

These are a valuable addition to the hardy and forcing class of Azaleas.

- Apple Blossom.** It resembles the Apple Blossom in color; glossy green foliage.
Bridesmaid. Glowing salmon flowers produced in large clusters.
Cherry Blossom. Dainty light pink, with white shadings toward the center.
Christmas Cheer. This name was suggested by its very brilliant coloring—a real Christmas red.
Coral Bells. A pleasing coral-pink color shading deeper in the center; very dainty.
Flame. Brilliant madder-red, with coppery suffusion; beautiful, medium-sized flowers.
Orange Beauty. Orange-pink. Flowers in immense clusters almost as large as Rhododendrons.
Pink Pearl. A beautiful salmon-rose, shading lighter in the center; large full trusses.
Salmon Beauty. An exceptionally fine shade of salmon-pink, with large, individual flowers.
Vesuvius. Fiery salmon-red, with slightly darker blotch. Dark green, glossy foliage.

Any of the above, 3-year-old, pot grown plants, each \$3.00.

COLD STORAGE LILY BULBS

We are prepared to ship the following in 25, 50 or 100 lots at any time; 50 bulbs supplied at 100 rate.

- LILIUM formosum** (Erabu black stem). Bulbs 10 to 12 in. 25 for \$14.00, 100 for \$50.00.
LILIUM giganteum. Bulbs 10 to 12 in. 25 for \$20.00, 100 for \$70.00.

WITH GENERAL DIRECTIONS FOR CULTIVATION

We give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any seeds, plants or bulbs we sell, and we will not be in any way responsible for them. If the purchaser does not accept the goods on these terms, they are at once to be returned.

W. E. MARSHALL & CO., Inc.

ARTICHOKE

One ounce will sow 100 feet of row, and produce about 500 plants.

A rich, sandy loam is best adapted for this plant. The seed should be sown in drills $1\frac{1}{2}$ inches deep and 1 foot apart. Transplant to rows 3 feet apart. They reach maturity the second year. Protect in Winter by a covering of leaves or coarse manure.

Large French Globe. Heads large, fleshy and of rich flavor. Pkt. 25c., $\frac{1}{2}$ oz. 60c., oz. \$1.00.

ARTICHOKE PLANTS

Large French Globe. Plants ready for shipment after April 1st. Doz. \$2.50, 100 \$20.00.

Jerusalem. Grown for the tubers, which resemble Potatoes, and are cultivated in a similar manner, but the rows should be at least 4 feet apart. Qt. 30c., pk. \$1.75.

ASPARAGUS *One ounce will produce about 200 plants.*

ASPARAGUS ROOTS

It requires 100 plants for a single row of 150 feet.

Culture.—The permanent bed should be trenched or ploughed very deeply, and well manured with rich, thoroughly decayed manure. Set the plants 18 inches apart in rows, carefully spreading out and separating the roots, and deep enough to admit of the top of the plants being covered 6 inches. In November the plants should have their annual top-dressing of manure after the stalks have been cleared away.

BEANS

Beans like a well drained, rich and light loam. Plant about the middle of April when warm and favorable, and at intervals throughout the season for a succession, until the latter part of August. Bush varieties should be planted in drills 2 feet apart, and from two to six plants to the foot in a row. Keep them well cultivated and draw the earth up to the stem. For String Beans gather the pods clean as soon as fit for use. The plants will remain all the longer in bearing.

POLE, OR RUNNING BEANS

Sow from the 1st of May (for all except Limas) to the latter part of May, in hills 4 feet each way. Limas should not be planted until warm weather has fairly set in. One quart of Limas will plant about 100 hills, allowing four or five beans to a hill, and of the smaller sorts about 200 hills. Poles 8 to 10 feet long should be firmly set in the hills before planting seed. Set poles 4 feet apart each way, and plant 4 to 6 beans about 1 inch deep around each pole. Thin out to three plants to a pole if the soil is rich; pinch off the ends of plants when they overrun the top of the poles, to effect more perfect growth below.

LEEK

One ounce will sow 200 feet of drill.

The leek is very hardy and easily cultivated; it succeeds best in light but well enriched soil. Sow as early in the Spring as practicable, in drills 1 inch deep and 1 foot apart. When 6 to 8 inches high transplant in rows 10 inches apart each way, as deep as possible, that the neck, being covered, may be blanched.

LETTUCE

One ounce will sow 200 feet of drill.

Sow in the open ground as early as possible, barely covering the seed. If the hotbed is used let it be started quite early. Give but little heat and plenty of water and air on fine days. Let plants in the beds be about 4 inches apart. As they increase in size thin them out or they will become weak. Plant for late use in a cool, partially shaded place in rich soil.

MUSHROOM SPAWN

Ten pounds will spawn about 10 feet square.

Mushroom beds may be made in a warm, dry cellar, or in any building where the frost does not penetrate, and in the open air during the Summer and Fall months. Having procured the spawn, the next thing to be attended

to is to make preparation for the beds. About two or three weeks before the beds are to be made collect a quantity of fresh horse manure without the straw; place it in a heap under cover, and as it heats keep turning it over once or twice a week, until the fiery heat has become exhausted, which will require from ten to fourteen days' time. When the manure is in a condition to be made up lay out your bed, according to your requirements, say 3 feet wide, 10 feet long and from 2 to 3 feet deep; beat it down well with the back of the spade as the process of building goes on. When the bed has been made some time, say a week or thereabouts, and the heat sufficiently declined to a temperature of 65 or 75 degrees, the spawn may be put into it. Break the spawn in pieces 2 inches square, and put them 6 inches apart, all over the bed; then cover the bed with 2 inches of rich soil. If everything goes on well, you may expect Mushrooms in about five or six weeks. When the soil looks dry give a gentle watering with tepid water, using a rose on the watering pot. Good crops of Mushrooms can be obtained by spawning the hotbeds in Spring.

Pure Culture Mushrooms

Pure Culture Prolific Direct Bricks. An American-made spawn which produces large crops of large size, deep cream, and excellent quality Mushrooms. Per brick 40c., 10 bricks for \$3.50, 50 bricks \$15.00.

PEAS

One quart will plant about 150 feet of drill

Peas mature earliest in a light, rich soil; for general crop a rich loam is the best. When grown in gardens sow in double rows 6 to 8 inches apart, the rows 2 to 4 feet apart, the tall ones requiring brush. Commence sowing the extra early varieties as early as the ground can be worked in February or March and continue for a succession every two weeks until July.

POTATOES GROWN EXPRESSLY FOR SEED IN MAINE

Peck will plant 100 foot row. Ten bushels cut tubers will plant 1 acre.

The Potato, like the robust-growing vegetable, can be grown with varying success on soils of all kinds and in all conditions of fertility, but the soil best suited to it is a sandy loam. Manure is applied either in rows or hills or broadcast over the hills and ploughed in—the latter in most cases being preferable. In highly enriched soils the plants are more liable to disease than when grown in soil that is naturally good. Plant as early in Spring as the ground can be had in fair working order, in hills or ridges, about 3 feet apart, cover lightly with soil about 4 inches deep.

Green Mountain Potato

Green Mountain (Certified stock). Oval shape; white skin and flesh; heavy yielding; good for Winter use.

Irish Cobbler (Certified stock). One of the best extra early varieties.

At the time of going to press with this Catalogue the Potato market is so unsettled that prices are subject to change.

We request those desiring Seed Potatoes to write for prices on the quantities wanted and we will give quotations by mail.

Unpriced orders will be filled at the prevailing market prices at time of shipment. Potatoes are forwarded by express or freight as directed, purchaser paying charges.

POTATOES FROM SEED

Potato Seeds from the True Seed Balls are the wonder of gardeners and a puzzle to scientists.

Growing new and distinct Seedling Potatoes from the seed ball is interesting. They will produce new kinds, shapes, sizes and colors, often 50 to 100 potatoes to a hill. All valuable new varieties are produced from just such seeds. Pkt. 15c., 4 pkts. 50c., 10 pkts. \$1.00.

Potato Seed Balls—One-third Size

PUMPKIN

One ounce will plant 50 hills.

The common practice is to drop two or three seeds in every second or third hill in the Cornfield, but if cultivated on a large scale the seed may be sown in hills 8 feet apart each way, four plants to each hill, and otherwise treated in the same manner as Melons or Cucumbers.

RADISH

One ounce of seed will sow 150 feet of drill.

Radishes require a light, loamy soil, moderately fertile, which should be deeply dug and well pulverized. The situation should be warm and sheltered. For an early supply sow in January or February in hotbeds, keeping well ventilated. In May they may be sown out-of-doors. Successive sowings should be made every two weeks. Radishes to be crisp and tender should make a rapid growth.

Winter varieties should be sown in July and August.

MARSHALL'S LAWN GRASS SEEDS

MARSHALL'S "SPECIAL" LAWN GRASS MIXTURE

Marshall's Special Lawn Grass Seed produces a perfect and enduring lawn of luxuriant richness with closely interwoven, firm and elastic turf, and it is usually ready for cutting in six weeks from time of sowing. This Lawn Grass is composed of a combination of various fine-leaved, deep-rooting grasses of interweaving habit, that flourish under our varied conditions, soils and climates, growing during different seasons of the year, so that a deep green, smooth and velvety sward, free from clumps, is maintained without burning brown in Summer.

This mixture contains highest grade re-cleaned seeds of Red Top, Kentucky Blue, Sheep's Fescue, Pacey's Rye and Red Fescue, blended in suitable quantities.

Price: Lb. 75c., 5 lbs. \$3.50, 20 lbs. \$13.50, 100 lbs. \$65.00.

MARSHALL'S "CENTRAL PARK" LAWN GRASS

Marshall's Central Park Lawn Grass will produce an even, dense growth of permanent sward as early in the season as it is possible to do. This mixture contains no annual grasses for making quick show to the detriment of a good lawn, but only those of lasting value and hardiness, which, when once established, need no reseeded for years. Our seed, which we know to be as pure as can be found anywhere, is of the best varieties, best suited for even and permanent growth; it is carefully cleaned and free as it is possible to make it from foreign matter.

1 lb. will sow 25x25 feet (625 square feet); 5 lbs., 50x50 feet (2500 square feet); 20 lbs. 100x100 feet (10,000 square feet); 100 lbs., one acre.

Price: Lb. 60c., 5 lbs. \$2.75, 20 lbs. \$10.50, 100 lbs. \$50.00.

MARSHALL'S "SHADY PLACE" LAWN GRASS

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those adapted for growing in shade. It has been successfully used on some large operations where a green sward was desired on land partially shaded by old trees.

Price: Lb. 80c., 5 lbs. \$3.75, bu. 20 lbs., \$14.50, 100 lbs. \$70.00.

SPECIAL LAWN GRASS MIXTURE FOR SEASIDE LAWNS

A mixture of fine grasses peculiarly suited to seaside lawns and very sandy soils.

Price: Lb. 70c., 5 lbs. \$3.25, 20 lbs. \$12.00.

MARSHALL'S TERRACE MIXTURE LAWN GRASS

A special mixture of grasses for sowing on terraces and side hills—grasses that produce strong, spreading roots, thus preventing heavy rain from washing them out; that will withstand drought and exposure, thrive on shallow soils and produce a rich, green turf throughout the season.

Price: Lb. 75c., 5 lbs. \$3.50, bu. 20 lbs. \$13.50.

PERMANENT GRASS MIXTURES FOR GOLF LINKS

MARSHALL'S PUTTING GREEN, or TENNIS COURT MIXTURE

A very carefully prepared mixture for use on putting greens, croquet lawns, tennis courts, bowling greens and lawns. This mixture produces a very thick, soft growth, when sown on a well-prepared ground, and mowed short will allow a ball to roll in almost a direct line. We especially recommend this mixture to those who are particular to obtain the very best. Our mixture contains only the very fine-bladed species of grasses without Rye Grass. 25 lbs. will seed a putting green 75 feet square.

Price: 5 lbs. \$4.00, 25 lbs. \$17.50, 100 lbs. \$70.00.

MARSHALL'S FAIR GREEN MIXTURE

Marshall's Fair Green Mixture is composed mainly of perennial native grasses and two very important European grasses which have proven of great value for Fair Green use. They are all of dwarf spreading growth, forming a close velvety surface which improves from year to year if given proper care.

This mixture contains no Clover but will be added if desired in quantity of one-half pound per bushel of grass seed. Sow 100 lbs. per acre.

Price: 20 lbs. \$10.50, 100 lbs. \$50.00.

GRASS FOR HAY CROPS AND PASTURES

MIXTURES FOR HAY AND PERMANENT PASTURES

The results obtained from our special Grass Seed mixtures are well known by the constantly increasing demand for them. Fall seeding is preferable, but Spring sowing will be successful if done early, while the land is cool and moist. In addition to the Grasses, we advise sowing 10 lbs. of Mixed Clover Seed per acre.

We recommend sowing 50 lbs. to the acre.

PERMANENT PASTURE MIXTURE NO. 1. For cool and light soils. Bus. (15 lbs.)

PERMANENT PASTURE MIXTURE NO. 2. For medium soils. Bus. (15 lbs.)

PERMANENT PASTURE MIXTURE NO. 3. For heavy soils. Bus. (15 lbs.)

Prices of any of the above Mixtures, 10 lbs. \$5.25, 50 lbs. \$22.50, 100 lbs. \$50.00.

Italian Rye Grass (<i>Lolium italicum</i>). It is a very rapid grower, forms a dense turf, and is regarded as an excellent hay grass.....	22 lbs.	.30	5.00	20.00
Kentucky Blue Grass (<i>Poa pratensis</i>). A very widely distributed species, and without a rival as a pasture grass. Being of perennial habit, it will, when established, last indefinitely. One of the finest varieties of grasses for use in lawns, owing to the thick growth of sod.....	14 lbs.	.75	8.25	65.00
Meadow Fescue, or English Blue Grass (<i>Festuca pratensis</i>). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures. It grows rapidly in rich and rather moist soils and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always mixed with other grasses.....	15 lbs.	.45	5.50	35.00
Meadow Foxtail (<i>Alopecurus pratensis</i>). One of the best grasses for permanent pasture, and should always form a fair proportion of the mixtures for that purpose. Thrives best on a rich, strong soil.....	10 lbs.	.60	5.50	50.00
New Zealand, or Chewing's Fescue (<i>Festuca rubra</i>). Resists extreme drought; thrives on inferior soils, gravelly banks and exposed hills. 25 lbs. to acre.	14 lbs.	.85	11.00	75.00
Orchard Grass . A good grass for hay crop, yielding nearly the same amount as Timothy and almost equal in feeding value. Orchard Grass will grow on almost every soil. It prefers a moderately dry soil with considerable sandy material. One of the best grasses for sowing in shady places and among fruit trees in orchards. 35 to 40 lbs. required for one acre.....	14 lbs.	.45	5.00	35.00
Red, or Creeping Fescue (<i>Festuca rubra</i>). Resists extreme drought, thrives on gravelly banks and exposed hills. Excellent for Lawns and Putting Greens, 25 lbs. per acre.....	14 lbs.	.60	7.00	50.00
Red Top, Fancy Cleaned (<i>Agrostis vulgaris</i>). A highly recommended grass for permanent pasture and as meadow grass for hay. Red Top is especially valuable for sour and acid soils, and meadow lands. Red Top makes one of the best grasses for lawn use, either sown alone or in connection with White Clover, or in a mixture with other grasses. Use 14 to 16 lbs. to acre.....	30 lbs.	.75	18.00	60.00
Rhode Island Bent (<i>Agrostis canina</i>). Cannot supply.				
Rough Stalked Meadow Grass (<i>Poa trivialis</i>). A spreading, stoloniferous rooted grass. Adapted for shady lawns and pasture mixtures.....	14 lbs.	.90	11.50	80.00
Sheep Fescue (<i>Festuca ovina</i>). A small tufted, hardy grass, of value in mixture for lawns or dry soil.....	14 lbs.	.50	6.00	40.00
Tall Meadow Oat Grass (<i>Avena elatior</i>). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture on account of its early and late growth.....	10 lbs.	.35	3.25	30.00
Timothy, or Herb Grass (<i>Phleum pratense</i>). The standard hay of commerce. The excellent quality of the hay and the ease of culture make it valuable. It is adapted to most soils, but succeeds best on moist loam and clay. Timothy sown alone requires about 20 lbs. per acre; when sown with Red Clover use 15 lbs. Timothy and 5 lbs. Red Clover.....	45 lbs.	.25	7.50	16.00
Wood Meadow Grass (<i>Poa nemoralis</i>). Excellent for shaded positions in lawns and woodland parks. Very hardy, resisting extremes of heat and cold.	14 lbs.	1.15	15.00	100.00

OATS

Sow 2 to 3 bushels to the acre, 32 lbs. to the bushel.

Storm King. The heads measure from 8 to 10 in. and the kernels are of immense size, thick, plump and heavy. It is very early, has great length of straw, producing 70 bushels per acre. We can safely say it is the greatest producer of any variety of Oats grown in this country. Bus. \$2.75, 10 bus. or over \$2.50 per bus.

Canada Cluster. A very early variety with long straw and thick, plump heavy grains. A true side Oat and heavy cropper. Bus. \$2.50, 10 bus. or over, \$2.25 per bus.

Swedish Select. A strong grower, grain rather short, plump and heavy. Yields well on any soils and under varied conditions. They have a stiff straw and are a branching variety with a great root development. Bus. \$2.75, 10 bus. or over, \$2.50 per bus.

PEAS

Canada Field. Valuable for cattle feeding. Also used for ensilage. Sown broadcast in the Spring at the rate of two bushels to the acre. Pk. \$1.50, bus. \$5.50.

Cow Peas, Clay. This variety is of extra strong growth and specially adapted for sowing in Northern States. Sow 2 bushels per acre, 60 lbs. per bushel. Bus. \$6.00.

Cow Peas, Whippoorwill. A very early maturing variety of upright or bush growth. Bus. \$6.50.

RAPE

Dwarf Essex. Fine for sheep pasture; valuable as a soil enricher. Plant in June or July in drills at the rate of 3 lbs. per acre, broadcast 5 lbs. per acre. Can be planted alone or with other forage crops. Lb. 25c., 100 lbs. \$15.00.

RYE

For grain, 1 bushel to the acre; for forage or soiling, 1½ bushels, 56 lbs. to the bushel.

Spring. This is excellent for a catch-crop, as it may be sown somewhat later than other grains and produces an abundance of green feed in the Summer season. Pk. \$1.25, Bus. \$4.50.

Giant Winter. This variety is fast gaining in popularity as a cover crop. If allowed to mature will produce a heavy crop of grain, and a fine quality of straw if cut about July 1. Pk. \$1.00, bus. \$3.50.

New Rosen. A four-row Winter variety introduced in Michigan. Pk. \$1.25, bus. \$4.00.

SORGHUM

Early Amber Sugar Cane. The earliest and most productive variety. Height, 10 to 12 ft. For ensilage or fodder it possesses good qualities; stock of all kinds relish it. Sow 7 lbs. in drills, or 15 lbs. broadcast, to acre. Lb. 15c., 100 lbs. \$12.00.

SUDAN GRASS

A new forage crop of immense value. Sudan Grass is strictly an annual and dies each year like Millet and must be seeded again each Spring. Sudan Grass reaches a height of from 7 to 9 feet, yet the stems are small and tender. The plant stools wonderfully and produces under favorable conditions as many as 100 stalks from a single root. The seed should not be planted until the soil has become warm in the Spring, and preferably on warm, light soil. Sow in drills 2 to 3 lbs. per acre; broadcasted, 16 to 24 lbs. per acre. Cut just after bloom, so ample time may be had for second growth. Lb. 25c., 100 lbs. \$20.00.

SUNFLOWER

DU PONT SEMESAN

Accelerates Seed Germination. Stimulates Plant Growth. Controls Diseases. Increases Crop Yields.

Semesan, a complex organic mercurial, while primarily a disinfectant for the control of seed borne diseases, possesses at the same time the remarkable properties of accelerating and increasing germination, producing more vigorous seedling growth and increasing crop yields from 5 to 40 per cent. It is suitable for the treatment of field, truck, forage and cereal crops, as well as flowers, grasses and ornamental plants. Applications of Semesan by either the dusting or liquid methods will in no way harm the seed germ.

Price 60c. per 2 oz. bottle; 4 oz. bottle, \$1.00; \$1.60 per 8 oz. can; 1 lb. can, \$2.75; \$13.00 per 5 lb. can; 25 lb. can, \$62.50.

Marshall's Matchless Flower Seeds

ALL FLOWER SEEDS ARE MAILED FREE AT PACKET, OUNCE AND
POUND RATE TO ANY POST OFFICE IN THE UNITED STATES

The following list contains a most complete assortment of the choicest and most popular flowers for either conservatory, greenhouse or garden culture.

Annals grow from seed, flower, mature their seed, and die in one year, or, in other words, the same season.

Hardy Annals are those which can be sown in the open ground.

Half-Hardy Annals are those which should be started early in the house, conservatory or hotbed, and transplanted to the garden in settled warm weather.

Biennials grow from seed, sown from June to August, flower, ripen their seed and die the next year, though some varieties bloom the same season if sown early in gentle heat.

Hardy Biennials will winter in the open ground without protection.

Perennials grow from seed, and continue flowering annually for many years after the first season. Some varieties flower the first season if planted early in gentle heat.

Half-Hardy Biennials require the protection of a coldframe or cool house during Winter.

Hardy Perennials can remain in the open ground during Winter without protection.

Half-Hardy Perennials require the protection of a coldframe or cool house during the Winter.

Tender or Greenhouse Perennials require window or greenhouse culture, free from frost during Winter and thrive in the garden during the warm months.

ASTERS

Plants from seeds sown in the open ground in May bloom finely in September and October, when the flowers are seen at their best. For July and August flowers sow in March or April, in coldframe, spent hotbed, or pots and boxes in the house. Cover the seeds about half an inch deep with rich, light soil, and when the plants have three or four leaves, transplant about 18 inches apart each way into well-prepared beds.

CUPID, or DWARF SWEET PEAS

These grow about 9 inches high and are adapted for borders or beds.

Finest Mixed Colors. Pkt. 10c., oz. 30c., $\frac{1}{4}$ lb. \$1.00.

SWEET PEAS

There are no Annual Climbers that are more popular or more admired by everybody than Sweet Peas. They are of the easiest culture, unrivaled for cutting, delightfully fragrant and of the brightest and daintiest colors imaginable. As soon as the ground can be worked in the Spring, sow the seed in trenches at least 6 inches in depth, then as the plants grow fill in the soil about one inch at a time until the trenches are full, taking care not to cover the young plants. Liquid manure applied occasionally will be found very beneficial. Pick the flowers frequently, for if allowed to form seed the plants will soon stop blooming.

MARSHALL'S SPENCER TYPE SWEET PEAS

The Spencer Types of Sweet Peas are a great improvement over the large flowering varieties. For cutting and exhibition purposes they are indispensable. The following varieties are a selection of the many kinds of this class best adapted for general use.

Afterglow. Reddish-mauve, violet wings.

Annie Ireland. Pure white, edged terra cotta pink.

Apple Blossom Spencer. Rose standards, blush rose wings beautifully waved.

Asta Ohn. Lavender, tinted with mauve.

Barbara. The best salmon for exhibition purposes.

Blanche Ferry Spencer. Rose standard with white wings.

Captain of the Blues. Maroon purple, wings blue.

Commander Godsal. A beautiful violet-blue.

Constance Hinton. Very large, black-seeded white.

Countess Spencer. Soft rose pink; large, wavy petals.

Defiance. Glowing orange scarlet, burnless.

Edward Cowdy. The best orange scarlet.

Elfrida Pearson. Blush pink, deepening toward the edges.

Fiery Cross. A fine red or scarlet, with no shading.

Florence Nightingale. One of the largest lavenders.

Flora Norton Spencer. Bright blue with a small tint of purple.

Hawlmarm Cerise. Glowing rose-cerise on cream ground.

Hawlmarm Pink. Bright rose-pink, flushed salmon.

Hercules. Rich clear rose-pink.

Helen Lewis. A fine crimson-orange, wings orange-rose.

Helen Pierce. White, mottled light blue.

Illuminator. Brilliant salmon-pink, very beautiful.

Jean Ireland. Creamy buff, standards margined carmine-rose.

King White. A perfect white Spencer, immense petals.

Lavender George Herbert. Bluish lavender.

Lady Evelyn Eyre. Blush pink, white ground.

Margaret Atlee. Salmon-pink, suffused over a cream ground.

Margaret Madison. Delicate azure-blue, slightly shaded mauve.

ROSES—Hybrid Tea, or Everblooming

This selection will produce a mass of Roses to cut from the entire season. The plants are American, two-year-old, and the varieties are the very best for outdoor culture; invaluable either for display or cutting and are hardy with protection.

Being almost as hardy as the June Roses, they can be treated in a similar way with regard to pruning.

All strong, American two-year-old field grown plants, \$1.00 each, \$9.00 for 10.

SUGGESTIONS FOR SPRING PLANTING OF ROSES

The soil should be thoroughly cultivated and a liberal supply of rotted manure added. In planting, dig a hole sufficiently large to accommodate the roots when spread out on the bottom of the hole. In filling in the soil, shake the plant lightly in order that the soil may mix between the roots. Fill in the soil and firm it in order that the plant may be solid. Be sure to see that the lower parts of the lower branches are below the surface of the soil. Do not plant in a mound, the surface should be level. Cut back the branches to within 4 to 6 inches of the surface of the ground. With this treatment the best results may be obtained.

FRUIT TREES

Planting.—Make the holes large enough to admit the roots without cramping or bending, and deep enough to set the trees to their natural depth. Fine surface soil should be used for covering the roots, and this should be carefully mixed among them. If the ground is dry, it is well to pour in some water when the hole is partially filled. See that the ground is firmly and solidly packed over all parts of the roots. Fill the holes full enough to be even with the surrounding surface after the fresh earth settles. Never use manure in contact with the roots.

Has one pair of 6-inch hoes only—the tools that are most constantly useful. Other tools can be added as needed.

No. 35 Seeder Attachment

The above can be attached to any Planet Jr. Single or Double Wheel Hoe. The Hopper holds a pint of seed, is indexed for all the principal seeds and will sow the last seed, so that a small packet can be sown without waste. Price, \$6.50.

PLANET JR. TOOLS.—Continued

No. 19 Farmers' Single Wheel Hoe, Cultivator and Plow

A cheap and efficient garden tool, consisting of one plow, one 10-in. sweep, one 5-in. sweep, one 2-in. cultivator and one 4-in. cultivator. Price, complete, \$6.00.

No. 119 Garden Plow and Cultivator

A new cultivator with a 24-in. wheel. A very useful tool for small gardens. Price, \$4.75.

Fire-Fly Garden Plow

Price, \$4.25.

This tool will enable a busy man to do nearly all the work of a family garden. Chicken raisers find it of great advantage in plowing up their scratching yards.

Planet Jr. No. 2 Lawn Edger

Every one who uses a lawn mower should have a Planet Jr. No. 2 Grass Edger. The cutting blade is made of the best quality steel and well sharpened. The handle is strong, being made of good quality wood. In order to have attractive lawns, keep the edges well trimmed. There is no better tool for this purpose than the Planet Jr. No. 2 Edger. Price \$1.60.

Planet Jr. Juvenile Wheel Hoe

A very desirable tool for the boys and girls who desire to imitate their "daddies" in garden work. Strong and easily handled. Proper size for youngsters 6 to 16. Price \$4.00.

No. 8 Planet Jr. Horse Hoe and Cultivator

The above as illustrated can be used for cultivating almost every known crop in rows. Price, complete, \$17.50.

Planet Jr. Star Pulverizer, Cultivator, Leveler, and Weeder

Very useful in flower gardens where plants are close. The star wheels break up the soil and the oscillating blade pulverizes it, and also cuts off the weeds directly beneath the surface. Used as a cultivator after a rain, this tool will not leave the ground in a lumpy condition. 7½ in. Pulverizer \$3.25; 14 in. Pulverizer \$6.50.

Extra Parts for Planet Jrs.

COLDWELL ELECTRIC LAWN MOWER

A simple, inexpensive power lawn mower for use on lawns which are not extensive enough to warrant the purchase of a gasoline mower. The electric mower is simple, clean and quiet. The plug will attach to any light socket and current is controlled by push button on the handle. The supply cable is carried on a reel which pays out and takes up automatically.

It has a five-blade revolving cutter and all gear drives enclosed in dustproof housings and run in oil. 150 feet of supply cable on reel. Weight 157 lbs. Width of cut 21 inches.

Price, \$175.00, f.o.b. Newburgh, N. Y.

THE IDEAL JUNIOR POWER LAWN MOWER

A baby brother to the Model 30—this Junior cuts from three to four acres per day. Cuts a swath 22 inches wide. Built for small grounds, cemetery work, and as an auxiliary unit to the Model 30 on larger grounds. Cuts clean. Adapted to trimming in close quarters.

Ideal Junior, 22-inch Power Mower with one cutting mower, F. O. B. New York, \$260.00.

Extra for one additional cutting unit, \$35.00.

THE IDEAL POWER LAWN MOWER

The most popular and the most adaptable of the "Ideal" line. Cuts a 30-inch swath. Rolls as it cuts. Will cut six to seven acres per day. Loosely suspended cutting unit tilts to ride over any irregularity of ground. A general purpose mower that cuts close to trees, shrubbery and flower beds. Mechanically simple—fool-proof—easy to operate.

Either the Model 30 or the Junior rolls as it cuts, thereby insuring a smooth, velvety lawn. All unsightly bumps are leveled, and there is no marring the lawn with hoof-prints or mutilation of shrubbery, as is the case with horse-drawn mowers and rollers. Weight 610 lbs.

BOLEN'S POWER MOWER

This Mower is especially suited for the mowing of lawns on country estates. It is a combined roller and grass cutter; by removing the cutting unit it becomes a power roller. The roller consists of six segments so built that each is free to turn without injury to the sod. It has a one cylinder air cooled motor using about one gallon of gasoline for 10 hours' work. Four of the roller segments can be quickly removed if roller is not wanted when cutting grass. Weight with roller, 475 lbs; with four segments removed, 385 lbs.

Model R 30-inch cut, 6 segment roller, \$265.00 F. O. B. factory.

BOLEN'S GARDEN TRACTOR

A light weight gasoline propelled power unit ready to hitch to a great variety of useful implements. It can be used for cultivating, hilling, hoeing, seeding, etc. The instant hitch attachment can be used with the interchange of tools. The speed is easily controlled with two driving sprockets from one to three miles per hour. The engine is air cooled and consumes about one gallon of gasoline in ten hours. The arched axle gives a clearance of 16 inches and the width of tractor is 18 inches. It has a double clutch drive with power turn for either wheel. Fully illustrated booklet mailed free on request.

Outfit D-3. Model D. Tractor with D101 instant hitch, one and two row cultivator frame with tool holders, 2 pair of 6 inch hoes and 6 cultivator teeth. Price \$206.40, F. O. B. factory.

DU PONT SEMESAN

With the development of **Semesan**, the du Pont Company made available the most effective all-purpose seed and plant disinfectant on the market. The use of this remarkable mercuric compound, the first that may be employed, either in dust or liquid form, not only provides disease control, but accelerates seed germination, invigorates seedling growth, insures sturdier stands and produces larger, more beautiful flowers, foliage and vegetable crops.

Semesan will control such disease organisms as "damping-off" of seedlings, stem rot of Carnations and root rot of Violets, which are borne in the greenhouse, coldframe and seed bed soils. When choice tubers or bulbs have been cut accidentally or in separation, **Semesan** will protect them from storage molds or rots. It is being increasingly used for the disinfection of cuttings, graftings, tools and general equipment used in agricultural operations.

No special apparatus is required to apply **Semesan** in either dust or liquid form. In general, the methods now employed in dusting or spraying are satisfactory.

SMOOTHING AND LEVELING HARROW

With this tool every field can be made as smooth as a floor and the soil pulverized fine enough for a flower bed—makes a most perfect Onion bed. This harrow is also a great road maker. One man, with team, can make a perfect trotting track of any road. It is adjustable with a lever, by which the entire action is controlled by the driver, and he can remove at will all the earth possible for the team to haul, taking it from hills or uneven places and putting it into hollows to level up the field.

ACME SEEDLING PICKER

A very handy tool for transplanting seedlings and small plants. A great labor and time-saving device. Each 25c.

FERGUSON'S COMBINATION SPRAYER AND SYRINGE

Three roses—fine, medium and coarse. Recommended for syringing under the foliage of plants where force is needed to keep down red spider, etc. Made of brass and screwed on the end of any ¾ in. hose, \$8.00.

CALIFORNIA SPRINKLER

This is the most popular Sprinkler on the market. It has four brass arms and is mounted on a sled, so that it can be easily dragged over the lawn without turning off the water. Price \$2.50.

"WATER WITCH" SPRINKLER

This Sprinkler works more satisfactorily with a low pressure of water than any other. No. 4, with stand, \$1.50.

RAIN KING SPRINKLER

The Rain King is a real innovation in the sprinkler line, and radically different from any other sprinkler ever made. A most wonderful variety of uses. Circular or stationary spray, fine or coarse, fast or slow, large lawn, small lawn, trees, shrubs, flower beds, takes care of them all. Small, compact, easily handled. Simple adjustments. For Putting Greens it is excellent. Each \$3.50.

THE "SKINNER" LAWN MIST IRRIGATOR

For lawns, vegetables or flowers this Sprinkler throws the finest mist that can be used out of doors. Mounted on two wheels and a caster. Length 15 feet, five-spray clusters, 36 inches apart. Total 15 nozzles. Each \$16.00, f.o.b. Troy, O.

PEACOCK SECTIONAL SPRINKLER

Made to cover large areas in lengths of 12½ feet. Five-spray clusters, 36 inches between. Total 40 nozzles. Each section mounted on a wheel truck at one end. \$18.00 per section, f.o.b. Troy, O.

THE LAWN SHOWER SPRAYER

Will throw an even, gentle spray over 25 feet in diameter at a water pressure of about 40 pounds. The nozzle may be directly connected to hose for washing sidewalks. It makes an attractive fountain display. Holder and nozzle complete. Price \$3.00.

"C. B. G." SPRINKLER

The C. B. G. Sprinkler is built on the principle of the tangential spray. Simple in construction and cannot get out of order. Each 60c.

BRASS FOUNTAIN SPRINKLER

Very simple in construction.

Cannot rust or get out of order.

Will not injure the lawn. Requires only ordinary pressure of water. Price \$1.00 each.

THE SAUCER LAWN SPRINKLER

The Saucer Sprinkler will cover a circle of from 30 to 50 feet, distributing the water like a refreshing rain. With each sprinkler is a half cap which can be used for a fan-shaped mist over a space of 30 by 20 feet. Simply

remove the full cap and replace the half cap and it is transformed into a half spray. Each 75c.

ROTO RAIN SPRINKLER

A sprinkler made to water large areas. It stands only nine inches high, made in heavy brass, and gears run in water. The large nozzles travel slowly and the inner arms faster. Each \$16.00.

SKINNER RAIN MAKER

Made of $\frac{3}{4}$ -inch galvanized pipe, fitted at 2-foot intervals with the famous Skinner System Silver Stream nozzles. Can be attached to your hose and at ordinary city pressure covers a strip of 50x18 feet.

With each line we also send a set of special nozzles, which will break the water into a very fine spray. Splendid for new or old lawns, delicate flowers or for narrow strips where the other nozzles would throw too far. The fine spray nozzles in the line cover a strip 30 feet wide—15 feet on either side.

Furnished complete, ready to erect.

Made in two 9-foot sections, connected by a patented coupling which you can put together with your hands.

Three-pointed iron rods support the line—push them into the ground, attach the hose and turn on the water!

Price, complete, \$10.50, f.o.b., Troy, Ohio. Weight, 25 lbs.

THE DAYTON ROTARY SPRINKLER

The Dayton Sprinkler is the most practical, durable and efficient sprinkler devised for watering lawns or gardens. It sprinkles in a circle from a 3-foot to a 40-foot radius, it operates with a 15-lb. up pressure of water and can be adjusted to any kind of a stream. All parts made with brass, aluminum and silver. Connections for $\frac{3}{4}$ -in. hose. Lawn Type "A." Each \$12.00.

WATER FAN LAWN SPRINKLERS

Model No. 6 Water Fan. An oscillating sprinkler 18 inches long, with eleven diverging outlet tubes, mounted on a rigid galvanized frame. With a pressure of 30 lbs. it will cover an area 15x50 feet. All gears are enclosed to protect them and provide for oil lubrication. Each \$15.00.

Model No. 8 is similar to No. 6, only that it has fifteen outlets, and with a water pressure of 35 lbs. will cover an area of 24x50 feet and is 22 inches long. Each \$18.00.

RAINMAKER LAWN SPRINKLER

This sprinkler is made on the turbine principle, the water coming from the nozzle strikes the turbine paddle on the wheel causing it to revolve. As the turbine wheel revolves it travels around the circular base carrying the jet around about eight times per minute. With a pressure of 40 lbs. it will cover a space of 300 sq. yds. Each \$25.00.

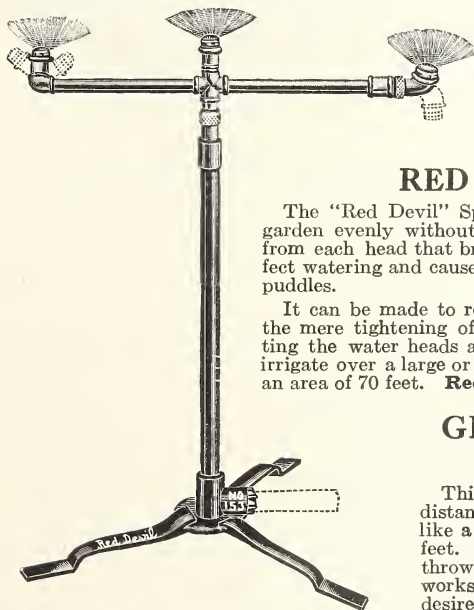

RED DEVIL LAWN SPRINKLER

The "Red Devil" Sprinkler is the only correct method of watering your lawn or garden evenly without waste of water. It sprays perfectly, throwing seven streams from each head that break into a mist-like cloud. This assures perfect watering and causes the water to penetrate instead of laying in puddles.

It can be made to revolve at any speed, or made stationary by the mere tightening of the set screw collar below the arms. Setting the water heads at different angles will cause the atomizer to irrigate over a large or small area. When set correctly it will cover an area of 70 feet. **Red Devil, No. 151.** Each \$15.00.

GIANT RAIN KING LAWN SPRINKLER

This Sprinkler is adjustable to height as well as distance, direction and volume of water. It plays like a gorgeous spiral fountain in any circle up to 90 feet. Easily locked so it won't revolve, or will throw water in 1, 2, 3 or 4 directions. Each nozzle works independently, throwing solid stream or any desired spray. It stands 4 feet high and has 20-inch arms. Price \$10.00.

SULPHATE OF AMMONIA

Used for top dressing crops. Ammonia, 24 per cent. nitrogen, 16 per cent. 100 lbs. \$7.00, 200 lbs. \$13.00.

FERTOBAC. Tobacco Fertilizer

Fertobac is a double action product—a natural fertilizer and a positive insecticide. It sweetens the soil, controls the worms, green fly, thrips, aphids, Strawberry beetle, cut worms, and all soft-bodied insects. It contains 3 to 4 per cent ammonia, 3 to 5 per cent potash, $\frac{1}{2}$ per cent phosphoric acid, and 1 to $1\frac{1}{2}$ per cent nicotine. 100-lb. bags \$2.50, ton \$45.00, f.o.b. Lancaster, Pa.

"ADCO" ARTIFICIAL MANURE

A simple preparation for making stable manure from garden refuse, grass clippings, weeds, leaves, vegetable tops, etc. It contains nothing injurious to health or animal life, is odorless and weed free.

Refuse can be piled in a heap or pit and with "Adco" added to the refuse causing the bacteria to rot and make manure. Fifty pounds of Adco makes a ton of well rotted manure.

Adco, in 25-lb. bags, enough for 12 wheelbarrows of waste or $\frac{1}{2}$ ton of manure. Each \$2.00.

Adco, in 150-lb. bags, enough to make 3 tons manure. Each \$10.50.

Inoculate Your
Alfalfa, Clovers, Cow Peas, Soy Beans, Vetches
and
Other Legume Crops
WITH
Mulford Cultures
FOR LEGUMES

Small Cost Large Returns Easy to Use No Labor Expense

Mulford Cultures contain pure, tested strains of active, vigorous nitrogen-fixing bacteria for inoculating seeds of legumes or soil.

Mulford Cultures are "different" and should not be confused with other brands.

Legumes offer the best known means of maintaining soil fertility and rejuvenating overcropped and wornout fields. They add both humus and nitrogen to your soil and thus increase your yield of wheat, cotton, corn and other non-legume crops.

The U. S. Dept. of Agriculture and many State Agricultural Experiment Stations recommend inoculation of legumes with nitrogen-fixing bacteria to induce a prompt "catch" and increase your yield.

Mulford Cultures are prepared for:

Alfalfa Lucerne
Crimson Clover
Sweet Clover

Red Clover
Alsike Clover
Bur Clover

Cow Peas
Soy Beans
Peanuts

Vetch
Velvet Beans
Sweet Peas

Garden Peas
Garden Beans
Lima Beans

Always specify on your order what crop you want to inoculate, as there is a different strain of bacteria for each legume.

Garden Size for Peas, Beans, Lima Beans and Sweet Peas, 35c.

For Large Seeds, Soy Beans, Cow Peas, etc. 1 bus. size 60c., 2 bus. size \$1.00, 5 bus. size \$2.25, 20 bus. size, \$8.00.

For small seeds, Alfalfa, Clovers, etc., $\frac{1}{2}$ bus. size 60c., 1 bus. size \$1.00, $2\frac{1}{2}$ bus. size, \$2.25, 10 bus. size \$8.00.
